FOREST TRAINING CENTER

The hotel grounds are transformed into a „Training Center", where Volunteers learn the skills they will need in a fight for survival.

The terrain, full of challenges and surprises, is divided into four zones: strategy, survival, orientation and combat.

Small teams of Volunteers overcome a variety of challenges in each zone, each of which requires different skills: mental, physical, psychological, and most of all, group cooperation. Everyone is needed, and will find a challenge that suits them.

Each team passes through each zone during the event, earning points towards their final score.

The rivalry between the Volunteers can get intense because the stakes are high: the respect of their peers

ORIENTATION ZONE

- Follow the maps and signs to the control points, to find 12 „hidden treasures" that may be critical for survival

COMBAT ZONE

- Hone your skills with an experienced archery instructor
- Creative weightlifting

SURVIVAL ZONE

- Differentiate edible vs poisonous plants, mushrooms & berries
- Find forest food, and go beyond your comfort zone
- Transport water

STRATEGY ZONE

- Four puzzles which require mental, digital, and logical dexterity
- Augmented Reality
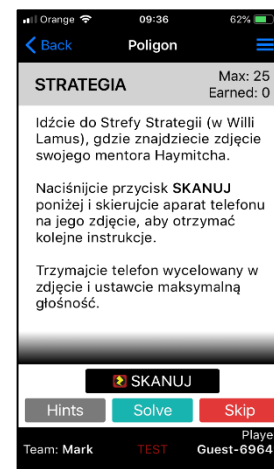

FOREST TRAINING CENTER

The event is supported by a customized mobile application, **ClueKeeper** which replaces the traditional „paper-based" approach to event management.
Each team receives a separate schedule, and teams are guided to particular locations and provided hints, directions, and reminders throughout the event.

Participants can track their results – and other teams' – in real time, increasing engagement and rivalry to the very end.
